

NARROWS

Strategy to Positively Influence Prescribing

Name the issue

"I see you have Mrs. Smith on Meropenem."

Ask for the reason

"Was there a particular reason you want to use this."

Reflect their emotion

"It can certainly be stressful to take care of people so sick."

Relate with personal experience

"I've lost sleep over this type of patient before, too."

Orient to suggested management

"We typically don't need Meropenem for community acquired pneumonia."

Work together on a plan

"Would you feel comfortable deescalating to Ceftriaxone?"

Set follow up

"I'll call you in 48 hours and we can discuss how the patient's doing, but you can call me sooner if you'd like."
